

Fabry International Network

Funding sources to year ending 31 December 2015

As an umbrella organisation representing Fabry Patient Support Networks in over 34 countries the Fabry International Network (FIN) does not have capacity to raise funds through fundraising and charitable foundations as it would be in direct competition with its members, the Fabry country patient networks. FIN receives funding from three pharmaceutical companies to support its core costs and specific projects.

Therefore the overall proportion of industry funding to FIN is 100% of total income. Two pharmaceutical companies each gave 43% of total income with one giving 14%.

A handwritten signature in blue ink that reads "Christine Lavery".
